Upgrade DAO Governance Voting System

DAO ID	cyber-governance-dao
Proposal	02 / 05

Purpose

Improve voting transparency, efficiency, and fairness for all DAO members.

Description

This proposal aims to upgrade the governance voting system by improving vote tracking, proposal status updates, and transaction verification. These changes will support secure and transparent decentralized decision-making.

Proposed Scope

The planned work includes clearer proposal state tracking, reliable vote receipt references, better error handling, and improved visibility into finalized results. Existing eligibility and voting rules remain subject to DAO approval.

Expected Deliverables

A tested voting workflow, updated governance interface, and documentation of verification procedures.

Demo document for development and PDF-RAG testing. This is not an approved or funded DAO proposal.
